

Bookmark Example

This example shows you how to use the [BookmarkProvider](#) in combination with a [PdfDrawableProvider](#) to highlight pages of the document that contain a bookmark. The bookmark indicator will only be drawn in the thumbnail bar and thumbnail grid, but can easily be added to the main document content as well.

Looking at the thumbnail bar below you can already see the red indicator on page 2 showing that it contains a bookmark. If you now open the thumbnail grid you will see that the indicator is also shown there.

The bookmarked page

This page contains a bookmark. You can see it in the thumbnail bar and thumbnail grid.
