QuickStart Guide

PSPDFKit
5 for Android

Introduction

PSPDFKit’s components are built on top of one another. It starts with the Core Viewer as the foundation of our framework, to which you can add on Annotations. The Forms component is then built on top of Annotations as a specialized annotation type. Finally, the Digital Signatures component is built on and works in coordination with Forms.

Indexed Full-Text Search, the Document Editor, Replies, Image Documents, Redaction, and Comparison are independent components and are licensed separately.

A collage of various documents and forms, including a CEO letter, a feedback form, and a report, with handwritten notes and red annotations. The documents are overlapping and tilted at different angles. The CEO letter is titled "1 - CEO Letter" and "Bucking the Market Trend". The feedback form is titled "Feedback Form" and "What do You Think?". The report is titled "Annual Report 2018" and "Please specify the issues you found in this report:". There are also some smaller documents and forms scattered around, including one with a "100%" graphic and another with a "We are part of" graphic. Handwritten notes in red ink are visible on several documents, including a signature and some markings on the CEO letter and feedback form.

PART ONE

Getting Started

Getting Started: Adding Your Licence

AndroidManifest

First, you'll need to supply your license key to your [AndroidManifest](#):

```
<application
    android:name=".AppName"
    android:allowBackup="true"
    android:icon="@mipmap/ic_launcher"
    android:label="@string/app_name"
    android:theme="@style/Theme.AppCompat.Light">

    <meta-data
        android:name="pspdfkit_license_key"
        android:value="@string/PSPDFKIT_LICENSE_KEY"/>

    ...
```

Getting Started: Java

Here is a simple example for getting started with PSPDFKit using Java on Android:

```
final Uri pdfUri = Uri.fromFile(getFilesDir(), "mypdf.pdf");
final PdfActivityConfiguration configuration =
    new PdfActivityConfiguration.Builder(context).build();
PdfActivity.showDocument(context, pdfUri, configuration);
```

Getting Started: Kotlin

Here is a simple example for getting started with PSPDFKit using [Kotlin](#) on Android:

```
val pdfUri = Uri.fromFile(getFilesDir(), "mypdf.pdf")
val configuration = PdfActivityConfiguration.Builder(context).build()
PdfActivity.showDocument(context, pdfUri, configuration)
```

Need More Help?

Documentation

We have comprehensive online documentation, which covers all the important features of PSPDFKit:

<https://pspdfkit.com/guides/android>

API Reference

The online API reference is updated with every release of PSPDFKit:

<https://pspdfkit.com/api/android>

New Features

We detail the new features of each new version of PSPDFKit on our blog:

<https://pspdfkit.com/blog>

Technical Support

For questions, issues, and feedback, feel free to contact our technical support team:

form

/fôrm/

noun

noun: **form**; plural noun: **forms**

a printed document with blank spaces for information to be inserted.

→ “an application form”

synonyms: questionnaire, document, coupon, paper, sheet

→ [oxforddictionaries.com definition](https://www.oxforddictionaries.com/definition/form)

From Wikipedia:

A form is a document with spaces (also named fields or placeholders) in which to write or select, for a series of documents with similar contents. The documents usually have the printed parts in common, except, possibly, for a serial number.
